About 225Ac-Lintuzumab

225Actinium-Lintuzumab is a drug construct consisting of the HuM195 (Lintuzumab) monoclonal antibody labeled with an alpha particle emitting radioisotope actinium 225. HuM195 targets the CD33 antigen expressed by most acute myeloid leukemia cells but not present on any non-hematopoietic cells. 225Actinium-Lintuzumab is currently being used in an ongoing Phase I trial. Actinium Pharmaceuticals is in the final stages of preparation for a new Phase I/II trial at multiple clinical centers in the U.S..

About Actinium Pharmaceuticals

Actinium Pharmaceuticals is an oncology focused biotechnology company. The Company's Alpha Particle Immunotherapy Technology (APIT) couples monoclonal antibodies (mAbs) with alpha particle emitting radioactive isotopes, in particular Actinium 225 and Bismuth 213.
